

Math 115: Precalculus, Fall 2010

Instructor: Maxx Cho

Course Website: <http://www.maxxcho.com/teaching>

Assignments for Week 9 (Oct. 25 to Oct. 29)

For SUNDAY, October 24th

1. WebAssign problems due 8AM on October 24th. **WARNING: This is due on Sunday.**

For Monday, October 25th

2. Reading assignment: review sections 3.1, 3.6, and 10.1 to 10.3.

3. In class on Monday: Review for Exam 2 (We will review sections 3.1, 3.6, and 10.1 to 10.3)

OPTIONAL Exam 2 Review Session: 4-5:30PM in Armory 0131.

For Wednesday, October 27th

EXAM 2 - on sections 3.1, 3.6, 4.1-4.4, 10.1-10.3 (Polynomial, rational, and exponential functions. Conic Sections)

NOTE: If you cannot take this exam on this date, you MUST send me an e-mail with a valid excuse by Friday, October 22nd. Otherwise, you will NOT be able to take the make-up exam.

For Friday, October 29th.

1. Read section 5.1

2. No quiz.

Figure 3.9.5. Descending sequences from Schubert (a) and Brahms (b). (c) These sequences result from moving downward along the equal-tempered lattice at the center of chord space (c), passing through the augmented triad without sounding it. (Major chords are dark spheres, minor chords light spheres.) (d) There are six sequences that can be formed in this way.
